

Cancer Genomic Testing

New offer in development available within some cancer conditions

Holistic Needs Assessment

Helps you identify the concerns that are most important so your healthcare team can refer you to other services if you need more help or support

Personalised Care Support Plan (PCSP)

Captures and provides a written record of the HNA conversations, decisions and agreed outcomes to support your health and wellbeing

Community groups

Online Support

Supported self-management

Patient Stratified Follow up (PSFU)

Gives patients control over their follow-up care allowing them to be seen when needed such as when their symptoms or circumstances change, otherwise avoiding the inconvenience of appointments of low clinical value

Health and Wellbeing support

Cancer Care Review

Conversation between a patient and your GP or a Practice Nurse to provide support after a cancer diagnosis

Treatment Summary
